Subject: Information request - 137-CE-139

We would like more detailed information regarding moving the proposed transmission line from one side of a road to the other in three locations. Specifically, we would like to know:

- more precise structure locations,
- the height of the structures needed to accomplish the move,
- the span between the two structures,
- an indication of the type and amount of vegetation that would be removed, and
- a cost estimate for #2 below.

The sites are:

1. Segment 43A; the proposed move from the west side to the east side of Patton Road approximately 1,500 feet north of the intersection of Patton Road and Cuba Valley Road,
2. Segment 32; a moving of the proposed line from the east side of STH 113 to the west side, approximately 1,600 feet south of the intersection of STH 113 /Bong Road, keeping it on the west side of STH 113 for about 1,900 feet, and then moving back to the east side of STH113,
3. Segment 8B; it is unclear if the proposed route moves from the east side to the west side and back again to the east side of Schumacher Road approximately 2,200 feet south of Cuba Valley Road.

If you have any questions, give me a call at 267-9197.

Thanks,
